BAS Manual Transfer Plate:

- The BAS Manual Transfer Plate is a simple aid which is designed to make boarding a vehicle from a wheelchair/scooter much more comfortable.
- The plate can be fitted to either the driver or passenger side and fills the gap between the seat and the door, allowing for easy and seamless transfer.
- Once in the vehicle the plate then swings up, taking up minimal space in the vehicle.
- A removable option is also available.
- An optional larger plate is available.

BAS Electric Transfer Plate:

Fitting service available throughout the UK

- The BAS Electric Transfer Plate is designed to lift up wheelchair/scooter users into the vehicle.
- It is suitable for people who need assistance in getting from a seated position to standing or a sideways transfer between a wheelchair and car seat where there is a difference in height.

- The transfer plate is electrically operated and is removed after use, which also allows non wheelchair users to board the vehicle with ease.
 - The lightweight design makes removing the plate extremely easy and simple to do.
- An optional remote control is available.
